## TIME DISTRIBUTION (समय विवरण)

Date: 2080/09/11  
27-Dec-2023  
4:00 PM

### Situation Overview

On the night of November 3, 2023, a 6.4 magnitude earthquake struck the Jajarkot and Rukum West district of Karnali Province with its epicenter located in Ramidanda, Jajarkot district, at 11:47 PM. Following the initial earthquake, numerous aftershocks occurred, causing fear among the local population. The ongoing aftershocks have compelled residents to evacuate their homes and seek to stay in open areas. A total of 18 local governments are affected where Jajarkot and Rukum West are severely affected in terms of human casualties, and damage to houses in Karnali Province.

## 31ST HEALTH AND NUTRITION CLUSTER MEETING, SURKHET, KARNALI PROVINCE 27 DECEMBER 2023

### Health & Nutrition Cluster Decision made through PHSD meeting on 2080-09-11 at 10:30 AM

The vaccination campaign 2080/81 for epidemic control in earthquake-affected districts, targeting measles, rubella, and typhoid, has been actively running since Poush 5, 2080. While the campaign has been executed effectively overall, certain areas have shown below-target Typhoid coverage. To address this, an awareness program is underway to boost coverage. Moreover, there is ongoing coordination with the Nepal Police, Nepal Army, Armed Police Force, and government employees to facilitate the administration of Typhoid vaccinations. In instances of insufficient coverage, decisions have been taken to collaborate with local schools, ensuring their involvement in Typhoid services to meet coverage requirements.

The initial stage of the vaccination initiative, set to commence in Surkhet on 2080-9-12, involves the collaboration of the Ministry of Social Development, Directorate of Health Services, State Health Supply Management Center, State Public Health Laboratory, and the Public Health Service Office Surkhet. Additionally, it has been determined that a team will be constituted, comprising members from diverse development partner organizations.

Efforts undertaken to address health issues observed after the earthquake of Jajarkot have been updated. Additionally, decisions have been made to regularly send information in the 4W format, previously dispatched by the Health Service Directorate, to monitor and manage potential health issues in areas that may be affected by earthquakes in the future. Furthermore, a decision has been taken to regularly forward details of post-earthquake deaths to PHEOC Surkhet in an organized manner.

Sub cluster	(Key activities performed)
<b>Reproductive Health</b>	Targeting pregnant and post-partum women, two nutritional packets of 3 kg each were distributed to 14,286 people with the support of WFP.
	IEC materials regarding hygiene and reproductive health were distributed in eight affected municipalities of Jajarkot and Rukum West districts.
	RH Kits have been distributed to birthing centres in the affected areas.
	Hygiene Kits distributed to pregnant mothers.
	Birthing centres are provided with essential obstetric drugs and quality equipment.
	Warm clothes were distributed to the pregnant mother and new-borns.
<b>Child Health and Nutritional Support</b>	Ensuring regular vaccination services provided by health institutions.
	Nutritious food items were distributed to the population of risk groups such as pregnant, pregnant mother, children aged 6-23 months.
	Ensuring the availability of essential medicines related to child health at the district and local levels.
<b>Mental Health and NCDs</b>	IEC materials regarding mental health were distributed in eight affected municipalities of Jajarkot and Rukum West districts.
	School teachers and health workers were provided Psychological First Aid, Primary Psychological Support (PSS) training and mobilized to provide PFA or PSS services to the needy people by teachers and by health workers.
	In coordination with the local level, the availability of medicines that people with chronic diseases are taking regularly and medical adherence are ensured.
<b>Disease Surveillance &amp; Control</b>	Orientation on Community based surveillance for FCHVs and health facility staff of municipalities and rural municipalities of Jajarkot and Rukum West is initiated. The program comprises the components of event-based surveillance relative to FCHVs along with the orientation to RRTs and national surveillance system.
	Active Syndromic Surveillance is being continued by the WHO in coordination with the relevant local level health coordinators in the local levels of Jajarkot- Kushe, Nalgad, Bheri, Barekot, Junichande, Chedagad, Shivalaya and Rukum West local levels- Athabiskot, Chaurjahari, Sanibheri.
	To increase health awareness after the disaster, IEC materials regarding sanitation, hand hygiene and awareness related to diarrhoea have been distributed to municipalities and rural municipalities.
	RDT Test kits have been sent to District Hospital, Jajarkot from Province Health Logistics Management Centre to support and strengthen the testing capacity of earthquake affected areas.
<b>Rehabilitation</b>	Two trained physiotherapists were assigned to provide for the needy people in the affected areas.
	The availability of rehabilitation services and assistive devices in earthquake affected health facilities is ongoing.
	In support of EDCCD a temporary rehabilitation facility will be set up with physiotherapy service and assistive devices in Bheri, Nalgad and Athabiskot Municipalities.
